SUMMARY

Full Stack Developer skilled in developing responsive web applications using React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in building REST APIs, authentication systems, and e-commerce applications with frontend, backend, and database integration. Developed full-stack projects involving user authentication, product management, cart, wishlist, checkout, and order management functionalities.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Frontend: HTML5, CSS3, Bootstrap, React.js

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Render

Concepts: REST APIs, CRUD Operations, Responsive Web Design

EXPERIENCE

IT Trainer – Full Stack Development

Livewire, Kanhangad, Kerala | *June 2026 – August 2026*

- Delivered training sessions on Full Stack Development concepts, including HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, MongoDB, and React.js.
- Guided students through practical coding exercises, mini projects, and web application development.
- Assisted learners in understanding frontend, backend, database, and API integration concepts.
- Provided technical support and troubleshooting assistance during hands-on sessions.

PROJECTS

Online Food Ordering Website

- Built a full-stack food ordering web application using React.js, Node.js, Express.js, and MongoDB, connecting the frontend, backend, and database into a complete workflow.
- Engineered user authentication and account management with REST APIs, enabling secure login and user-specific application functionality.
- Integrated cart, wishlist, checkout, order management, and contact modules to support the complete food-ordering process from product selection to order placement.
- Deployed the frontend on Vercel and backend on Render, using Git and GitHub for source-code management and project version control.

Veeyar Fresh Vegetables & Fruits Website

- Designed a responsive e-commerce interface for browsing and purchasing fresh vegetables and fruits with a clean and user-friendly shopping experience.
- Created dynamic product displays with category-based navigation and product information to make item discovery easier for users.
- Implemented product search, sorting, cart, wishlist, and checkout functionalities to streamline the online shopping experience.

- Optimized the interface for different screen sizes using React.js, JavaScript, Bootstrap, and CSS, ensuring consistent usability across devices.

AI-Powered Vehicle Diagnostic System Using Exhaust Sound

- Engineered an AI-based vehicle diagnostic system that analyzes exhaust sound patterns to identify potential vehicle conditions.
- Extracted acoustic features such as MFCCs, spectrogram characteristics, and Zero-Crossing Rate from exhaust sound signals for diagnostic analysis.
- Processed and analyzed audio signals to identify meaningful patterns associated with different engine conditions.
- Applied machine learning techniques to classify engine conditions based on extracted exhaust sound features.

Heart Disease Prediction Using Machine Learning

- Built a machine learning-based prediction system to estimate heart disease risk using relevant patient clinical and demographic data.
- Prepared and analyzed the dataset by performing data preprocessing and selecting relevant features for model development.
- Trained and evaluated machine learning models using Scikit-learn, TensorFlow, Keras, and XGBoost to identify patterns associated with heart disease risk.
- Integrated the trained model with a web-based interface to provide user-friendly prediction and interaction.

INTERNSHIP

Data Analytics Intern

Metaloop Global It Services—2023

- Explored data analysis workflows and analytical techniques for solving data-driven problems..
- Worked with data interpretation and analysis processes to understand how insights can be derived from data.
- Gained practical exposure to data-oriented problem solving within an IT services environment.

Data Science & Machine Learning Intern

Cyborg AI Gen Automation 2025

- Explored data science and machine learning workflows for solving data-driven problems.
- Worked with core machine learning concepts and analytical approaches.
- Studied applications of AI-driven automation and its role in data-oriented solutions.

EDUCATION

B.Tech in Computer Science and Engineering

APJ Abdul Kalam Technological University (KTU)

KMCT College of Engineering for Women

2022–2026

Kozhikode , Kerala

Higher Secondary

NAM Higher secondary school

2020-2022

Kannur, Kerala

SSLC

Ramavilasam Higher secondary school

2019-2020

Kannur, Kerala

CERTIFICATES

App Development with Flutter - MetaLoop Global IT Services	2024
Back-End Technologies - Full stack Developer Academy	2025
Front-End Technologies - Full stack Developer Academy	2025
Robotics with AI & Embedded System - MetaLoop Global IT Services	2025

LANGUAGES KNOWN

English, Malayalam, Hindi
